## PAR 30 32W LED Bulb – 10000K Daylight

SKU: 1765 | Category: Bulbs

### PRODUCT OVERVIEW

The PAR30 32W LED Bulb (10000K) delivers ultra-bright daylight illumination with excellent energy efficiency. It is designed for commercial, industrial, and retail applications where high brightness, long life, and reliable performance are required.

### DESCRIPTION

The PAR30 32W LED Bulb – 10000K is engineered to provide powerful, daylight-quality illumination for demanding lighting applications. Its advanced LED technology produces a bright and consistent light output while consuming significantly less energy than traditional lighting solutions.

The bulb features a durable aluminum housing that ensures efficient heat dissipation, helping extend its operational lifespan and maintain stable performance over time. The PAR reflector design provides a focused beam, making it ideal for accent lighting, display lighting, warehouses, retail stores, and workshops, and commercial interiors.

With a 10000K color temperature, this LED bulb creates a crisp white daylight effect that improves visibility and enhances the appearance of large spaces. It offers instant start-up with no flickering or warm-up time, ensuring dependable illumination whenever needed.

Designed for long-lasting performance and minimal maintenance, the PAR30 32W LED Bulb is an excellent choice for businesses seeking reliable, energy-efficient lighting with superior brightness.

## KEY FEATURES

- 32W ultra-bright daylight LED bulb
- 10000K crisp white color temperature
- Durable aluminum housing for efficient heat dissipation
- Focused PAR reflector beam design
- Instant start-up – no flickering or warm-up time
- Ideal for accent, display, warehouse, retail, and commercial interior lighting
